OCCUPATIONAL SAFETY, HEALTH AND ENVIRONMENT
POLICY OF UNIVERSITI MALAYSIA PERLIS

Universiti Malaysia Perlis (UniMAP) is committed to establish a safe and healthy workplace for all that safeguards the environment through systematic work culture among every staff, student, visitor and contractor.

To realise this policy, UniMAP will ensure, as far as practicable, the following measures are implemented:

1. To make the management of occupational safety, health and environment as a priority in every university’s activity inside and outside campus.

3. Undertake responsibility to achieve the objectives and targets set, by identifying and assessing risks, taking preventive actions to reduce accidents and injuries which may result in losses, property and environmental damage, as well as work-related diseases.

4. To create an action plan towards improvement, encompassing aspects of awareness, competency, communication, welfare, responsibility and cooperation between employer and employees.

5. Review from time to time, the policy, training, system, programmes and work procedures for continual improvement.

Prof. Ir. Ts. Dr. R. Badlishah Ahmad
Vice Chancellor
Universiti Malaysia Perlis
